EXPERIENCE

Internship

Luminar Technohub, Kochi

Python Django Full Stack Developer (February 2024 - Present)

- Acquired hands-on experience in Python, Django to develop full stack applications.
- Proficient in HTML, CSS, Bootstrap, JavaScript, Git and Git hub, with practical experience showcased through a capstone project.
- Drove tangible results during the internship by actively participating in and completing projects, resulting in a 30% increase in project efficiency.

PROJECTS

CareLink

CareLink is a comprehensive platform developed using Django, focusing on buying and selling clinical devices, personal care products, and hiring home nursing services. The project aims to streamline healthcare procurement, enhance accessibility, and provide a user-friendly experience. Key features include user management, a marketplace for clinical devices and personal care products, home nursing services, secure payments, and order management. Implemented SMTP authentication to secure email communications. Additionally, implemented OTP generation for password resetting to improve security and user experience.

Banking System: Modernized Banking Operations

Utilized Django function-based views for a responsive interface, focusing on user interaction. Implemented comprehensive CRUD operations for Withdrawals, Deposits, Balance Inquiries, and Mini Statements. Incorporated a secure and user-friendly "Forgot Password" feature. Integrated efficient email notifications for real-time updates.
